

RELIANCE NIFTY FIFTY 18%

Reliance Nifty Fifty 18% is an 18% crude protein calf feed comprising EITHER 50% by weight of a grain-based mineralised pellet with coccidiostat and mixed with straights - available in bulk* OR a fully compounded pelleted option in 25kg bags.

In a bulk blend format **Reliance Nifty Fifty 18%** combines the precision and consistency of pellets with the economy of selected straights that do not require processing. The fully pelleted format delivers the same nutritional specifications whilst offering the convenience of conventional bags and efficiency of a fully pelletised option.

KEY FEATURES AND BENEFITS

- A thrifty calf feed option, made from quality ingredients available in a grain-based mineralised pellet or loose blend format, without losing any feed quality
- An 18% protein calf feed
- Use as a starter, grower or transition feed option onto an all-pasture diet
- Contains essential vitamins (including comprehensive range of B vitamins) and minerals to support good calf health, growth and development
- Contains the coccidiostat Bovatec® 20CC

Reliance Nifty Fifty 18% has been designed for calf rearers who intend to feed higher levels of hard feed – either to support higher levels of growth or fill a forage deficit due to seasonal conditions or stocking rates. With a higher proportion of carefully selected higher fibre straights - with slower rumen fermentation rates - it is less

Product available in 25kg bags, or made to order (minimum quantity 6 tonnes) as 1T Bulk Bags and Loose Bulk.

*Blend only available in 1MT bulk bags or loose bulk.

nutrient dense than higher energy calf feeds but better suited to the higher feeding rates some units require.

Formulated to deliver 18% crude protein to support lean tissue development in growing cattle, **Reliance Nifty Fifty 18%** can be used as a starter, grower, or transition option as calves progress to an all-pasture diet. The **Reliance Nifty Fifty 18%** blend option contains quality ingredients in a loose meal form mixed with a mineralised, grain-based pellet. Bovatec® 20CC has been added to **Reliance Nifty Fifty 18%** for the prevention and treatment of coccidiosis. Calves build up immunity to coccidiosis slowly and can still be vulnerable in the 8 weeks after weaning so **Reliance Nifty Fifty 18%** is a good option for weaned calves transitioning to an all-pasture diet.

RELIANCE NIFTY FIFTY 18%

FEEDING RECOMMENDATIONS

Reliance Nifty Fifty 18% can be offered from the first week of life after good colostrum intake has been achieved. Offer fresh daily and clean out troughs regularly. Hand feeding immediately after milk feeding can encourage early intake. Additional coccidiostat may be required in the milk until **Reliance Nifty Fifty 18%** intake is sufficient to aid in the control of coccidiosis.

Provide **Reliance Nifty Fifty 18%** along with fresh whole milk or calf milk replacer for young calves and pasture or restricted hay to support rumination for calves up to 9 months of age.

Wean off milk gradually at a minimum 6 weeks of age and/or 65-80kg liveweight when daily consuming between 1 to 1.5kg/day **Reliance Nifty Fifty 18%** depending on size and breed. Keep feeding **Reliance Nifty Fifty 18%** for a minimum of four weeks post-weaning. For optimum performance feed **Reliance Nifty Fifty 18%** until six to eight weeks after weaning or a liveweight of 100 to 120kg has been achieved.

Reliance Nifty Fifty 18% should be used to help meet growth targets whenever pasture supply or quality is limiting. Feed up to 3kg/head/ day according to animal weight based on the recommended rates for Bovatec® 20CC detailed on the next page and note that the treatment rate will not be achieved for animals over 150kg if intakes are capped at 3kg/head/day.

Reliance Nifty Fifty 18% is not a complete feed. Always ensure adequate long forage is available to support rumination. Always introduce new feeds gradually (over 10-14 days) to allow the rumen to adapt whilst shy feedings build confidence. Optimum feeding rates depend on pasture availability and quality and the age and condition of the stock.

Ensure clean fresh, reachable drinking water is always available.

Contains added macro and trace minerals. If supplementing trace elements in other ways (e.g., pasture, drench, or injection), please consult your nutrition specialist or veterinarian.

INGREDIENTS SELECTED FROM

Processed grains (including barley, maize, wheat), plant proteins (beans, canola meal, maize DDGS, peas, soyabean meal, sunflower pellets), soy hulls, wheat feed, grass fibre, molasses, minerals (including limestone flour, dicalcium phosphate, salt), trace minerals (including copper and selenium), vitamins (including A, D₃, E, range of B vitamins including Biotin), Bovatec® 20CC, mould inhibitor, and flavour.

May contain or be sourced from genetically modified source crops. **Reliance Nifty Fifty 18%** has been formulated without PKE, may contain traces of PKE used in the feed mill. **Reliance Nifty Fifty 18%** does not contain any restricted animal material.

TYPICAL ANALYSIS[^] (APPROXIMATE ON A DRY MATTER BASIS)

Crude Protein %	18
Dry Matter %	87
NDF % (max)	30
Metabolisable Energy** MJ ME/kg	12

[^] Variations in nutritional values may occur due to natural variability in feed ingredients. Our FeedSafe NZ certified sites have well developed systems to minimise any variation from the typical levels shown.

** The Metabolisable Energy (ME) values are calculated by a registered laboratory from an equation and are not an actual measured value. Therefore, they are only a guide for predicting the energy content of a feed.

STORAGE

Store in a cool, dry vermin free environment out of direct sunlight. Remove pallet wrap when in final location to prevent sweating.

COCCIDIOSTAT

WARNING STATEMENTS

DANGER

KEEP OUT OF THE REACH OF CHILDREN

FOR ANIMAL TREATMENT ONLY

READ LABEL BEFORE USE

Reliance Nifty Fifty 18% calf feed with 500g Bovatec® 20CC/tonne.

ACTIVE INGREDIENT: Lasalocid sodium 100mg per kilogram

CONTAINS: 500g Bovatec® 20CC/tonne, which is registered pursuant to the ACVM Act 1997, No. A009679.

See www.foodsafety.govt.nz for registration conditions.

DIRECTIONS FOR USE: This product must not be used for growth promotion in ruminants intended for human consumption. By law the user must take due care, obtaining expert advice if necessary to avoid unnecessary pain and distress when using the product other than as directed on the label.

INDICATIONS: Delivers 100mg of Lasalocid sodium/kg as 500g Bovatec® 20CC/tonne as an aid in the control of coccidiosis caused by Eimeria species in cattle. Feed 0.5kg of Reliance Nifty Fifty 18% per 50 kg calf to provide 1mg Lasalocid per kg of body weight.

Ensure young animals have access to Reliance Nifty Fifty 18% at least 2-3 weeks prior to weaning as coccidial challenge is most likely to occur in the first eight weeks after weaning.

DOSE RATE: For coccidiosis control, minimum dose rate of 5mg Bovatec® 20CC/kg liveweight (1mg Lasalocid sodium/kg liveweight) is required per day, (0.5 kg Reliance Nifty Fifty 18% per 50kg live weight). Up to twice this dose (2mg Lasalocid sodium/kg liveweight) is indicated where severe coccidial challenge is expected or a wide range of individual liveweights occur within a group.

CONTRAINDICATIONS: Care must be exercised when feeding concurrently with other antimicrobials.

Do not feed with other ionophores, e.g., monensin capsules, liquid, or premix. Do not exceed recommended dose rates.

CAUTION: Do not allow dogs, horses (or other equids), alpacas (or other camelids) access to feeds containing Bovatec®20CC, as ingestion by these species may be fatal.

WITHHOLDING PERIODS: It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

Cattle

Meat: Nil

Milk: Nil

Not for use in bobby calves.

DISPOSAL: Avoid any contamination of any water supply with this feed.

DO NOT FEED TO ANIMALS OTHER THAN THOSE STIPULATED ON THIS LABEL

RECYCLE ME

Reliance bags with the Recycle Me logo use 25% less plastic per bag compared to previous versions, giving them a lower carbon footprint and enable their recyclability through Agrecovery. Reliance bags are made from woven polypropylene. Scan the QR code below for more information.
