

Bagged Calf Hard Feed: Quick Guide

All product specs below are the Typical Analysis and on a dry matter basis

Seales
Winslow

RELIANCE
FEEDS

Farmlands

Premium

The cream of the crop of calf feed for early rumen development and with the benefit of gut health additives for supporting increased feed intake and optimum calf health.

SealesWinslow Calf Max 20% Moozlee

12.8 MJ ME
20% Crude Protein
38% Starch
<4% Crude Fat
<15% NDF

SealesWinslow Calf Max 20% Pellets

13 MJ ME
20% Crude Protein
38% Starch
<3.5% Crude Fat
<15% NDF

SealesWinslow Calf Max 16% Pellets

12.5 MJ ME
16% Crude Protein
38% Starch
<3% Crude Fat
<20% NDF

- High starch and low fat for optimum rumen development.
- Free from PKE and copra.
- All include NuStart® Evolution- a combination of essential oils and prebiotic to boost the immune system, digestive health and appetite of calves. Helps to support calves through transition, supports gut health and enhances rumen development for more robust calves that are better equipped to deal with disease challenge in their environment.
- Acid Buf for optimum rumen health and gut protection.
- Calf specific trace elements and vitamins including a comprehensive range of B vitamins.
- Bovatec® coccidiostat to aid in the prevention of coccidiosis.

Standard

High powered for supporting optimum rumen development, but at a slightly lower cost as they don't contain gut health additives. Exclusive to Farmlands.

Reliance Calf Grower 20% Pellets

12.5 MJ ME
20% Crude Protein
35% Starch
<3% Crude Fat
<20% NDF

Reliance Calf Finisher 16% Pellets

12.5 MJ ME
16% Crude Protein
35% Starch
<3% Crude Fat
<20% NDF

Reliance Kiwi Calf 19% Pellet

12 MJ ME
19% Crude Protein
39% Starch and Sugar
<2.5% Crude Fat
<21% NDF

- High starch and low fat for optimum rumen development.
- Free from PKE and copra.
- Calf specific trace elements and vitamins including a comprehensive range of B vitamins.
- Deccox® coccidiostat to aid in the prevention of coccidiosis, but with less risk to non-target animals such as dogs and horses and also the preferred coccidiostat for some premium niche markets.
- Does not include the gut health additives found in the SealesWinslow Calf Max Range, apart from Kiwi Calf 19% which contains essential oils for supporting gut health.

Value

Value range, with economy being made due to the lower starch and high fibre (NDF) level.

SealesWinslow Value Calf 19% Pellets

12 MJ ME
19% Crude Protein
>25% Starch
<3.5% Crude Fat
<25% NDF

SealesWinslow Value Calf 16% Pellets

11.5 MJ ME
16% Crude Protein
>25% Starch
<3.5% Crude Fat
<30% NDF

- Lower starch level compared to other SealesWinslow and Reliance calf feeds.
- Free from PKE and copra.
- Calf specific trace elements and vitamins including a comprehensive range of B vitamins.
- Rumensin® coccidiostat to aid in the prevention of coccidiosis
- A cost-effective option without the added gut health additives found in the SealesWinslow Calf Max range.
- Higher fibre (NDF) level may limit early intakes, but is a good choice to use after weaning if higher feeding rates may be needed.
