

RELIANCE LEVEL UP

Reliance Level Up is a comprehensive supplement designed to be added to whole milk (not Calf Milk Replacer) to help boost the health and vitality of calves from 3 days of age.

Contains many of the additives used to make calf milk replacer to literally level up the playing field.

KEY FEATURES AND BENEFITS

- Protexin® probiotic – a blend of live viable microbes which benefits the calf by improving the intestinal microbial balance, optimising digestion of feed and enhancing their health, naturally
- Actigen prebiotic – refined functional carbohydrates which support animal performance and well-being
- An essential oil pack associated with increased dry matter intake and weight gain
- Contains the essential minerals sodium and magnesium which can be lacking in whole milk but are important for appetite
- Seven essential trace minerals included at therapeutic amounts to support the health and vigour
- Twelve vitamins known to be deficient on whole milk and often poorly produced within the pre-ruminant calf that play key roles in appetite, disease resistance and vitality
- Contains the specialist coccidiostat Decoquinatate, which is a well proven aid in the prevention of coccidiosis but is not classed in any countries as an antibiotic so will not impact animal's eligibility for nonantibiotic for life programmes

A veritable powerhouse designed to help make whole milk even better and support milk-fed calves through the challenges they inevitable face.

Product available in 15kg bucket

ACTIVE INGREDIENTS PER 10G DOSE (ELEMENTAL LEVEL OF MINERALS DETAILED)

Probiotic (1.8 x 10⁹ CFU/g), prebiotic (1.5g), essential oils (0.2g), betaine (40mg), cobalt (0.2mg), copper (7.5mg), iodine (0.5mg), iron (60mg), magnesium (500mg), manganese (45mg), selenium (0.3mg), sodium (500mg), zinc (60mg), vitamins [vitamin A (9,000IU), B₁ (5mg), B₂ (5mg), B₃ (12mg), B₅ (5mg), B₆ (10 mg), B₉ (0.4mg), B₁₂ (0.05mg), Biotin (0.05mg), C (75mg), D₃ (1500IU), E (125mg)], COCCISTOP® Premix (Decoquinatate 40mg). Product does not contain any restricted animal material.

RELIANCE LEVEL UP

DIRECTIONS FOR USE

Mix only when required. Mix vigorously into a small quantity of warm whole milk before adding and stirring thoroughly to the batch of milk just prior to feeding. Agitate the milk to remix if left standing for some time. Feed at body temperature (38-39°C).

Do not add to mineralised calf milk replacer or supplementary feed. Calculate the daily amount required based on the number of calves being fed per batch of milk. If milk is fed twice per day ideally deliver half the daily amount in each feed. Wash hands thoroughly after use.

Ensure that clean drinking water is available at all times and that calves have access to quality calf feed and restricted access to hay or straw.

Keep buckets, bottles, and other equipment clean. Wash hands thoroughly after use.

May be fed concurrently with calf feed containing an ionophore.

DOSAGE

Administer 10g/calf per day to fortify the equivalent of 6L of whole milk. For calves below 40kg, a feeding rate of 7g/calf per day should be used. For best results feed every day with milk through until weaning.

A level scoop = approx. 50g (5 calves x 10g doses, or 7 calves x 7 g doses).

A 250mL metric cup = approx. 200g (20 x 10g doses). Weighing is recommended when preparing milk for larger numbers. Doses per 15kg tub: 1,500 x 10g. Measuring scoop included in container.

DISPOSAL

Avoid release to the environment as is harmful to aquatic life with long lasting effects. Dispose of contents or container in accordance with local and national regulations.

STORAGE

Store in a cool (below 30°C), dry and vermin free environment out of direct sunlight and away from foodstuffs.

Securely reseal packaging after use. Avoid contact with eyes, inhalation, and ingestion.

COCCIDIOSTAT

WARNING STATEMENTS

KEEP OUT OF THE REACH OF CHILDREN

FOR ANIMAL TREATMENT ONLY

READ LABEL BEFORE USE

Reliance Level Up with 40g COCCISTOP® Premix (4g Decoquinatate)/kg

ACTIVE INGREDIENT: 4mg decoquinatate/ 1g **Reliance Level Up**

CONTAINS: COCCISTOP® Premix (100g/kg Decoquinatate). COCCISTOP® Premix is registered pursuant to the ACVM Act 1997, Number A011546. See www.foodsafety.govt.nz for registration conditions.

DELIVERS: 40mg Decoquinatate per 10g dose of **Reliance Level Up**
28mg Decoquinatate per 7g dose of **Reliance Level Up**

INDICATIONS: To aid in the treatment and prevention of coccidiosis in calves.

DIRECTIONS FOR USE: **By law the user must take due care, obtaining expert advice if necessary to avoid unnecessary pain and distress when using the product other than as directed on the label.**

Note: To ensure the COCCISTOP® Premix is properly mixed it is important to first premix **Reliance Level Up** with a small quantity of whole milk before adding to the entire volume to be fed.

DOSE RATE: For treatment and prevention:

For prevention only, aim to feed a daily dose of 0.5mg/kg body weight of decoquinatate, (e.g. 10g **Reliance Level Up** per 80kg calf).

To aid in the treatment of coccidiosis, provide a daily dose of decoquinatate of 1mg/kg body weight, (e.g. 10g **Reliance Level Up** per 40kg calf). **Reliance Level Up** should be fed continuously for a minimum of 28 days. Additional COCCISTOP® Premix can be added to the milk if the 10g feeding rate is insufficient for the weight of calves and level of protection required.

A representative sample of animals should be weighed before treatment either with scales or weigh band. Where there is a large variation in size within the group, draft into two or more lines based on body weight, to avoid excessive overdosing.

WITHHOLDING PERIOD: It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food notice: Maximum Residues for Agricultural Compounds.

Cattle

Meat: Nil

Milk: Milk intended for sale for human consumption must be discarded during treatment and for not less than 35 days following the last treatment.

Not for use in bobby calves

DO NOT FEED TO ANIMALS OTHER THAN THOSE STIPULATED ON THIS LABEL
