

## RELIANCE FREE RANGE LAYER MASH

Reliance Free Range Layer Mash is a complete feed for free ranging hens.

### KEY FEATURES AND BENEFITS

- Balanced energy, protein and amino acids for good egg size and production
- Balanced calcium and phosphorus for good egg shell quality and bone strength
- A wide range of vitamins, minerals, and trace elements for flock health, and to support production
- Yolk colourant for golden yolks
- Only quality grain and protein sources
- Prebiotics and probiotics proven to support gut health for improved egg production, shell quality and feed conversion

Reliance Feeds are part of our quality assurance program and are quality tested to meet their stated specifications.

### FEEDING RECOMMENDATIONS

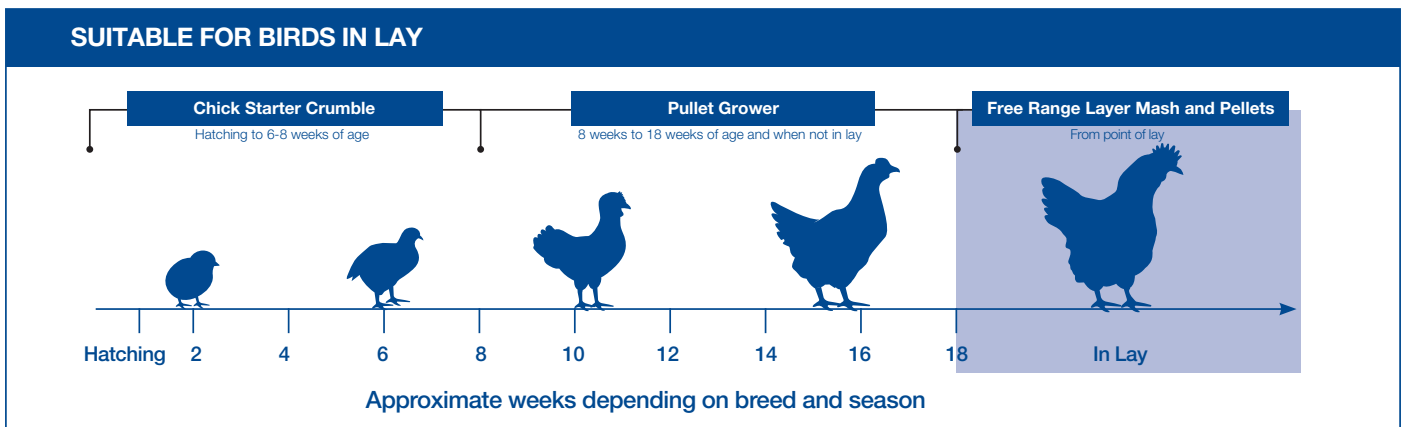

Ensure hens have continuous access to **Reliance Free Range Layer Mash** daily. Do not restrict consumption. Provide in self-feeders designed for poultry, rather than on the ground, to ensure that feed is continuously available. An alternative feed that hens can be offered from the point of lay is **Reliance Free Range Layer Pellets**. Offer the hens fresh feed every day.

Product available in 25kg bags (South Island only).

Appropriate consumption of **Reliance Free Range Layer Mash** is 130 to 140 grams per bird per day for a mature, fully grown hen.

To ensure a balanced diet, **Reliance Free Range Layer Mash** should make up a large proportion of the hen's daily diet. Other feed sources such as vegetable scraps, grains, pasture or hay may be fed, but only in small amounts. **Reliance Free Range Layer Mash** should be kept fresh and mould free to ensure maximum benefits to productivity.

MARKETED AND DISTRIBUTED BY FARMLANDS CO-OPERATIVE SOCIETY LIMITED

We guarantee the quality of Reliance Feeds. For more information please contact us.

RECYCLE ME

# RELIANCE FREE RANGE LAYER MASH

Hens should have an unlimited source of clean, fresh drinking water available at all times.

Although **Reliance Free Range Layer Mash** provides the daily requirements of calcium for good shell quality, additional oyster shell grit can be fed. Offer grit separately, do not sprinkle on top of feed. Best results are achieved when fed in the afternoon.

## INGREDIENTS SELECTED FROM

Barley, wheat, maize, peas, wheat by-products, soyabean meal, canola oil, choline, methionine, lysine, threonine, prebiotic, probiotics, minerals (including dicalcium phosphate, limestone, salt), sodium bicarbonate, vitamins, yolk colourant.

**Reliance Free Range Layer Mash** may contain or be sourced from genetically modified source crops.

## TYPICAL ANALYSIS<sup>^</sup> (APPROXIMATE ON AN 'AS FED' BASIS)

Crude Protein %	16
Dry Matter %	88
Salt % (minimum)	0.2

<sup>^</sup>Variations in nutritional values may occur due to natural variability in feed ingredients. Our FeedSafe NZ certified sites have well developed systems to minimise any variation from the typical levels shown.

## STORAGE

Store in a cool, dry and vermin free environment out of direct sunlight. Remove pallet wrap when in final location to prevent sweating. Do not feed pellets which have become wet and moulded.

**DO NOT FEED TO ANIMALS OTHER THAN THOSE STIPULATED ON THIS LABEL**

## RECYCLE ME

Reliance bags with the Recycle Me logo use 25% less plastic per bag compared to previous versions, giving them a lower carbon footprint and enable their recyclability through Agrecovery. Reliance bags are made from woven polypropylene. Scan the QR code below for more information.
